

Immunitone Plus™

BOTANICALS AND MUSHROOM EXTRACTS
120 VEGETARIAN CAPSULES | NPN80091331 | IMP120-CN

Immunitone Plus™ is a comprehensive herbal formula designed to support healthy immune system function. It contains herbs that support normal immune function. These herbs help support the balance of cytokines, which are the regulatory proteins released by immune cells as part of a normal immune system response. The standardized herbs in this formula contain optimal and consistent amounts of the most active ingredients.

The herbs and mushrooms in Immunitone Plus™ help the immune system respond effectively. Echinacea and Andrographis are herbs that promote a healthy inflammatory response to help support normal immune function. Astragalus, green tea extract, medicinal mushrooms, and beta-glucans help support a healthy immune response. Elderberry helps support antioxidant status in the body, which also aids the immune system to function normally. Arabinogalactan helps to promote normal microbial diversity in the gut, which also supports immune health.

Benefits

- Supports a normal immune response
- Promotes a healthy inflammatory response
- Supports antioxidant status in the body

Recommended Dose

Adults: Take 4 capsules once per day with meals, or as directed by your health care practitioner. Consult a health care practitioner for use beyond 12 weeks.

Highlights:

- Echinacea (standardized to contain 4% echinacoside) and Andrographis (standardized to contain 4% andrographolides) to promote a healthy inflammatory response
- Astragalus and green tea extract (standardized to contain 98% polyphenols and 45% pigallocatechin gallate [EGCG]) to support a normal immune response
- Elderberry to support antioxidant status in the body
- Arabinogalactan to promote normal microbial diversity in the gut
- Mushroom blend and beta-glucans to support immune function
